CONFERENCE THEME

The need for sustainable development is to ensure that natural resources are used equitably. The conference theme “Quality Infrastructure for Clean and Sustainable Development” provides an opportunity to deliberate on the key challenges being faced by the industry and the way forward. Many of the member associations of ASPAC are investing significantly in infrastructure development not only with their own financial resources but also with funding from MDBs. This conference will provide Member Associations (MAs) of FIDIC a platform to share and interact for mutual benefit. Infrastructure development is happening at an accelerated pace in India and in countries in the region. We invite players from across the world to come for exploring business opportunities and building partnerships. The theme of the conference is expected to cover the most important parameters for infrastructure development with optimal solutions ensuring Quality and Sustainability.

OBJECTIVE

The objective of the Conference is to encourage regional cooperation by sharing and enhancing knowledge on the different infrastructure requirements of each country.

CEAI

Consulting Engineers Association of India (CEAI) is an apex body of consulting engineers with a pan-India membership, comprising professional consulting engineering organisations and eminent engineering consultants. It is the Indian Member Association of FIDIC (Fédération Internationale des Ingénieurs-Conseils) i.e., International Federation of Consulting Engineers. CEAI, a non-profit organisation, is registered as a Society, under the Societies Act.

ASPAC

ASPAC represents the consulting engineering industry in Asia and Pacific Region as the regional grouping of FIDIC Member Associations. ASPAC has 22 member countries. The main objective is to encourage regional cooperation amongst the member associations by sharing and enhancing knowledge on the different infrastructure requirements of each country.
